

7. RAPID RESPONSE

In the event that an illness – including COVID-19 – occurs at camp, our protocol is structured to **Isolate, Confirm, Respond, and Remove** the impacted Scout or Scouter.

We will then communicate closely with the Scout's unit and health officials.

IF SIGNS OF ILLNESS ARE DETECTED

- When any sign of illness is detected in a Scout, leader or staff member, two individuals (*with appropriate spacing*) must immediately escort that individual to the Health Lodge without any stops or contact with others along the way.
- The individual will be evaluated and if it's determined that the individual must go home, they will be kept comfortable until adequate transportation can be arranged.
- Appropriate health authorities will also be notified.

IF SOMEONE BECOMES ILL AT CAMP

- If a Scout, leader or staff member develops fever, chills, cough, shortness of breath, new loss of taste or smell, vomiting, diarrhea or others for which another cause cannot be confidently determined, that individual will be required to leave camp.
- That individual will be kept comfortable until adequate transportation can be arranged.
- Appropriate health authorities will also be notified.
